SPECIALIST

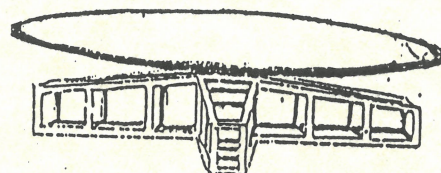

PRESENTATION

EQUIPMENT

Concept Engineering have for many years provided specialist mechanical and electrical equipment for visual effects and presentation purposes within the Film, Television, Theatrical and Exhibition industries.

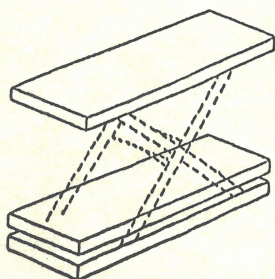

Dry Ice Machines

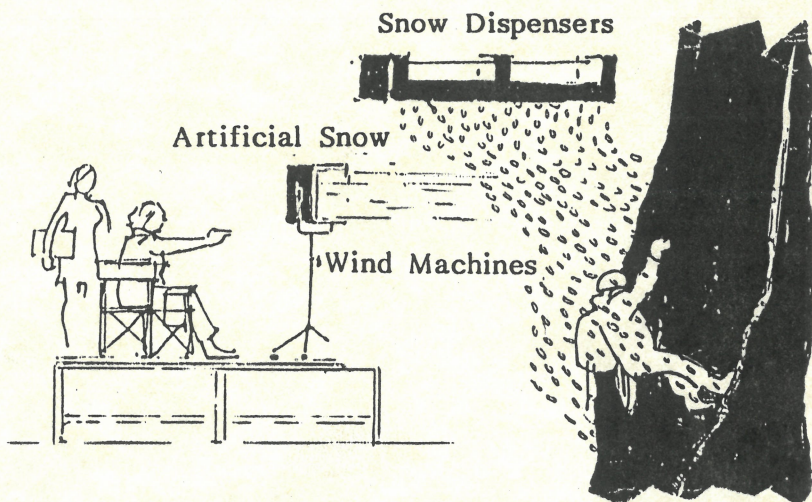

Turntables

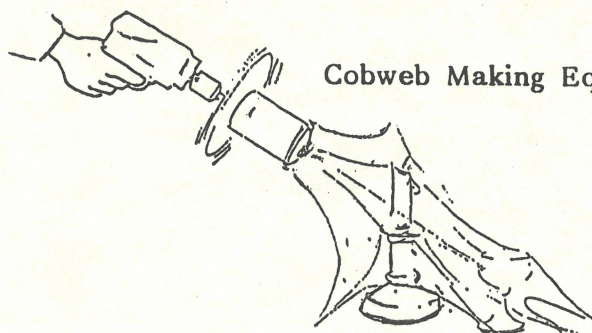

Concept Hire and Sell all of the equipment detailed in this catalogue unless otherwise stated. Sale only items marked *

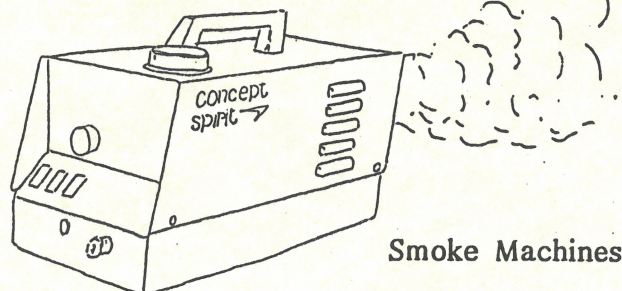

Scissor Lift Tables

The equipment detailed in this catalogue can help give your presentations greater impact, and we are always happy to adapt and alter our products (where possible) to suit your particular requirements. Of course fully trained operators can also be supplied.

Cobweb Making Equipment

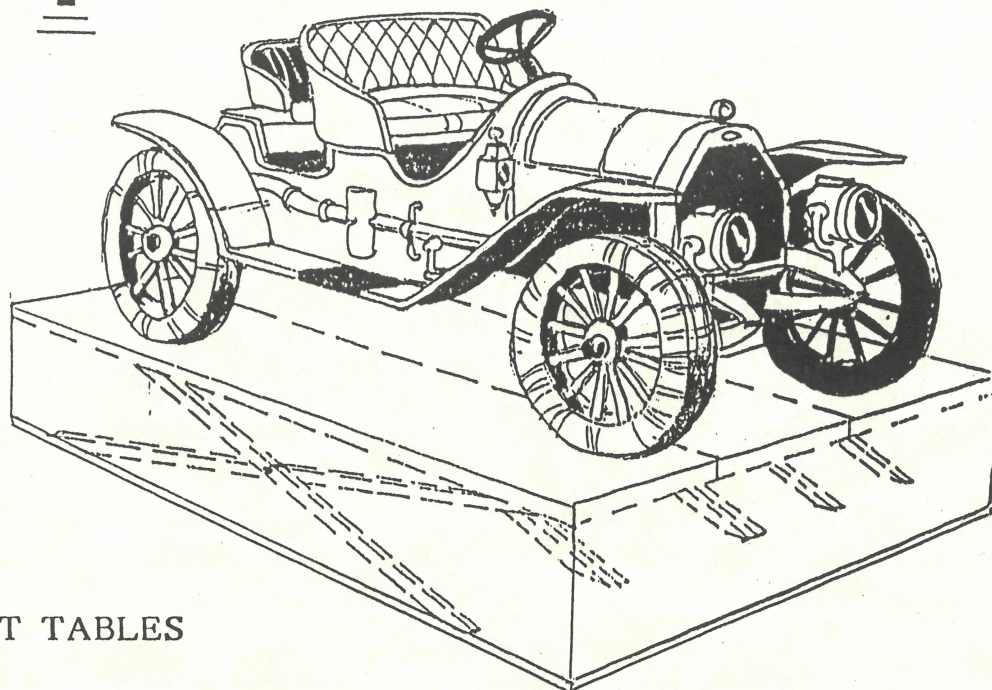

Smoke Machines

Concept also have a fully equipped engineering workshop for specialist project work.

give your presentations a lift !

SCISSOR LIFT TABLES

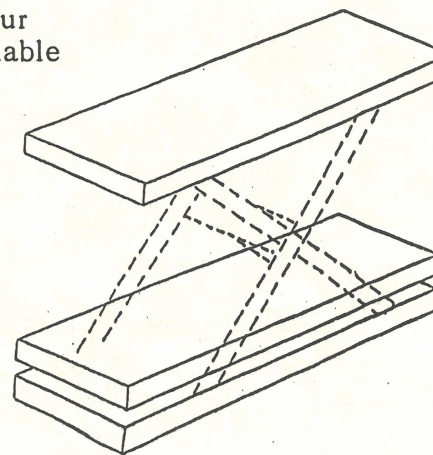

The CONCEPT SCISSOR PLATFORM LIFTS are the perfect answer for product launches, exhibitions, presentations and concerts where the reveal of anything from a person to a car may be called for.

The lifts are of rugged yet simple construction, ensuring smooth, quiet and extremely reliable operation. The lifts can be stacked to give a greater stroke of lift, and can be synchronised so that simultaneous "reveals" can take place.

With a large number of lifts in hire stock CONCEPT are able to combine units to produce a tremendous variety of options to suit your requirements. CONCEPT also have a range of Scissor Lifts available for sale --- Ask us for a quotation.

SCISSOR PLATFORM LIFTS

Closed height from ground	27 cm
Raised height from ground	106 cm
Size of platform	171 x 41 cm
Lifting capacity	500 kg
Weight of lift	170 kg
Time up	21 seconds
Time down	25 seconds
Power	440v, 3 phase, 2 amps/phase

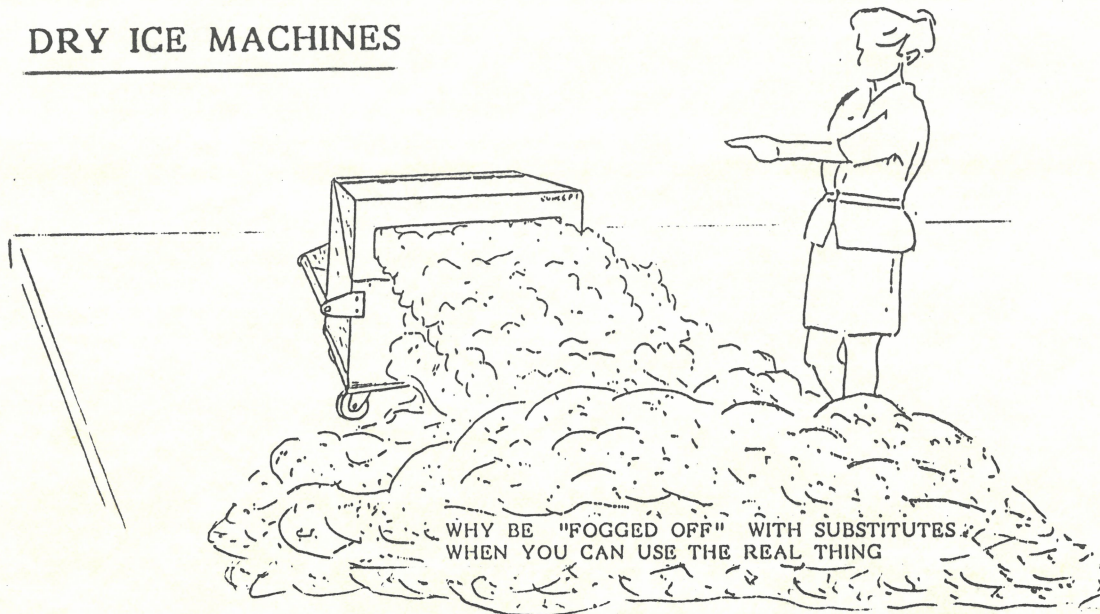

The power pack for these lifts is built into the main frame. Control of the lifts is via remote module (up and down push buttons). Motion stops on release of buttons or automatically at end of travel.

DRY ICE MACHINES

THE CONCEPT LONDONER FOG MACHINE

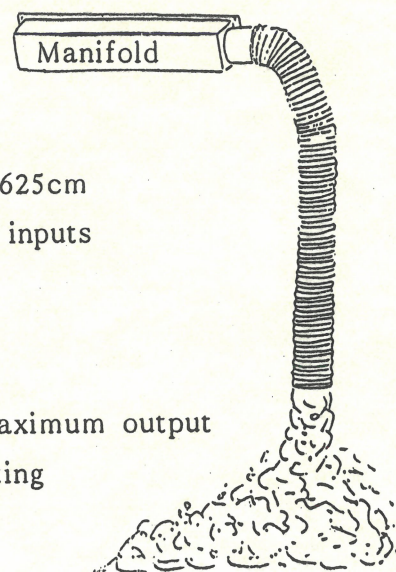

AS USED BY THE PROFESSIONALS

There really is nothing like a true "Dry Ice" effect, where a dense cloud of water vapour hugs the ground, and will not rise even if disturbed by movement in the cloud.

And there really is nothing like the LONDONER to produce spectacular "Dry Ice" effects. The machine has a tremendous output of low lying fog, produced either directly from the front of the machine or through the optional manifold and flexible ducting (used, for example, to produce a waterfall effect).

GENERAL SPECIFICATION (APPROX)

Size	115cm x 85cm x 625cm
Power supply	4 x 13A, 240v ac inputs
Water content	50 litres
Dry Ice capacity	35 kg
Heating up time	25 mins
Running time	10-15 mins. at maximum output
Optional extras	Manifold and ducting

Cardice (dry ice) is not supplied by CONCEPT, but we can advise you of your nearest stockist.

smoke generators

With over twenty years experience in the production of smoke machines Concept have developed the most comprehensive range of smoke generators available today to fulfill the requirements of the film, television, exhibition and presentation industries.

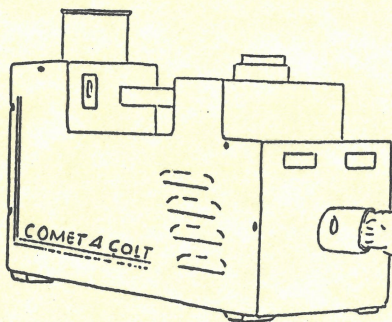

Unlike virtually all other "water based" smokes on the market today, Concepts unique smoke chemical formulations offer you the choice of two types of smoke , to suit your requirements.

PERSISTENT

Essential for creating the even, hazy atmospheres required to make the very best of your lighting effects. The smoke is of similar persistency to traditional oil smoke , but with none of the associated mess.
(Comet 4, Comet 4 Colts, Spirit A)

QUICKLY DISPERSING

Ideal for steam effects or any presentation that calls for smoke that "doesn't hang around". (Comet 3, Spirit B)

- 'Off Power' facility or 'Remote' facility
- High Smoke Output
- Safe
- Low Running Costs
- Hand Portable
- Reliable and Simple to Operate

Details on our various models are enclosed for your information and we will of course be pleased to advise you as to the most appropriate generator, what is possible , and what is not possible.

Give us a call. We are here to help you.

ARTIFICIAL SNOW *

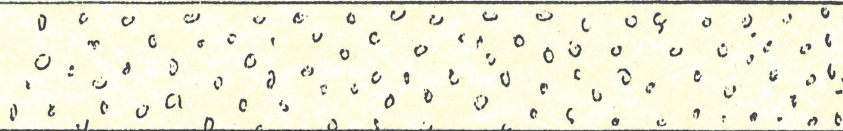

By
CONCEPT

The best artificial snow around, CONCEPT'S SHOW SNOW achieves an amazing resemblance to the real thing by shredding a carefully selected copolymer film to produce flakes with a similar size, density, colour and opacity to that of a snowflake.

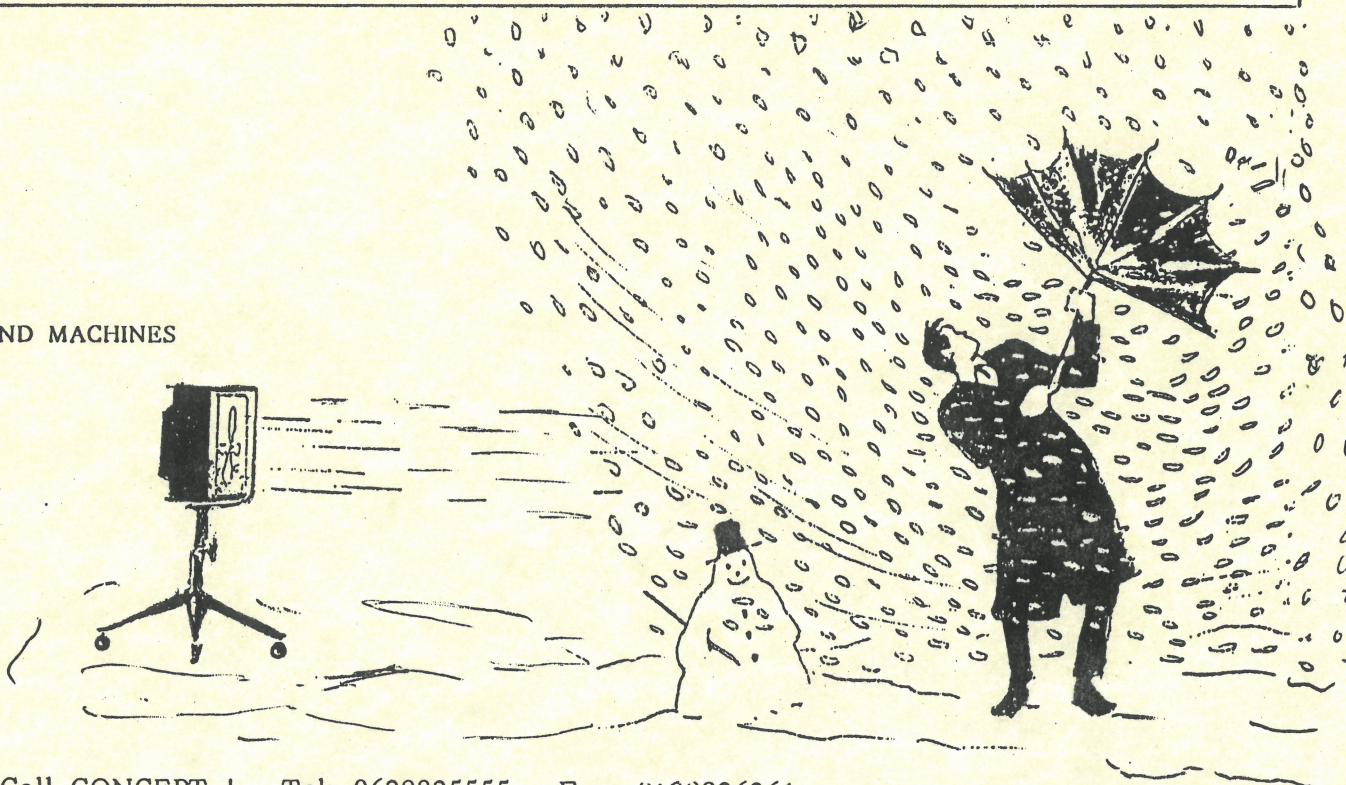

Consequently the snow produces a realistic effect whether it is laid on the ground for display purposes or used to simulate falling snow using a conventional snow dispensing device. Excellent blizzard effects can also be achieved using the snow in conjunction with a wind machine.

CONCEPT SHOW SNOW is supplied in heat sealed polythene sacks (58 L approx) which will cover an area of 10 square metres to a depth of 4mm.

The snow can, of course, be re-used time and again provided that it is kept clean and free from foreign matter.

SNOW DISPENSERS *

To give an even spread of falling snow which looks just like the real thing CONCEPT offer a SNOW DISPENSER, a machine which when filled with SHOW SNOW and suspended 4-5 metres above floor level produces a realistic effect along its 2 metre length.

These machines can be "ganged up" in line to give greater length of falling snow or "staggered" one behind the other to give a greater depth of falling snow. The choice is yours.

The SNOW DISPENSER can be set to give anything from a light sprinkle to a heavy fall of snow.

SNOW DISPENSER SPECIFICATION (APPROX)

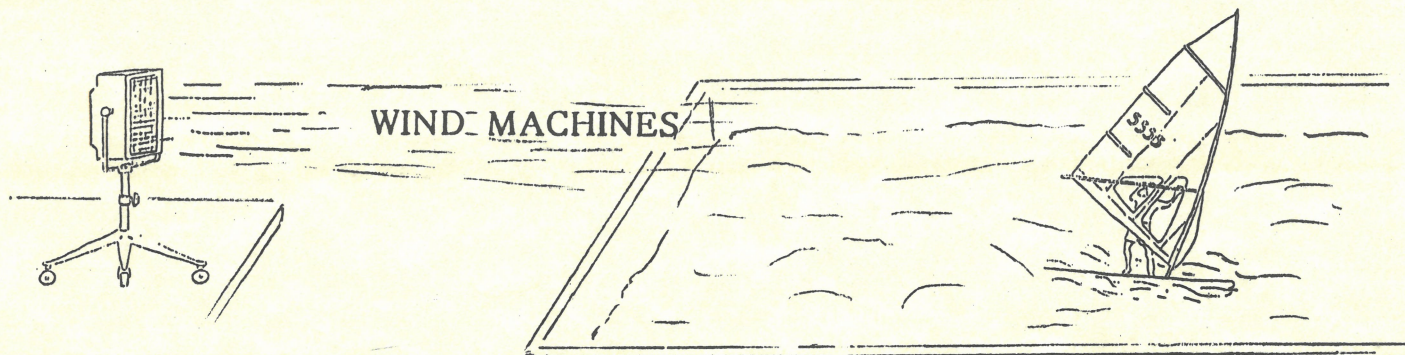

Size 192cm x 42cm 24cm
Weight 20 kilos
Power Supply 220/240v 50Hz
Duration of snow fall per loading.... 30 min (moderate fall)

The SNOW DISPENSER has no external working parts and is virtually silent in operation.

WIND MACHINES *

Manufactured in aluminium and galvanised steel, the Concept Wind Machine is of rugged construction to meet the requirements of the special effects industry.

With a controllable airflow output of 0 - 8,500 cubic feet per minute, and a low sound pressure level (even at maximum output) the Concept Wind Machine is the ideal solution whether you need to simulate a gentle breeze a howling gale or a blizzard (using Concepts Show Snow , of course !)

The Concept Wind Machine is delivered "ready to use", and can stand on its own sturdy castors or be mounted on a stand using its rotating steel yoke. Directional louvres are fitted to all machines.

SPECIFICATION (approx)

Fan Speed (maximum).....	1,380 rpm
Airflow Output (maximum).....	8,500 cfm
Sound Pressure Level (maximum).....	78 db at 1 metre
Electrical Supply.....	220/240v 50 Hz (110v optional)
Nominal Rating.....	0.7 Kw
Nominal Current.....	3.5 A
Size (without stand).....	33" x 39" x 15"
Airflow Directional Control.....	Adjustable Louvres
Airflow Speed Control.....	Full Thyristor, variable 0 - maximum
Directional Control (with stand).....	Pan, Tilt, Rotational
Height.....	Variable dependent on stand type

OPTIONAL EXTRA

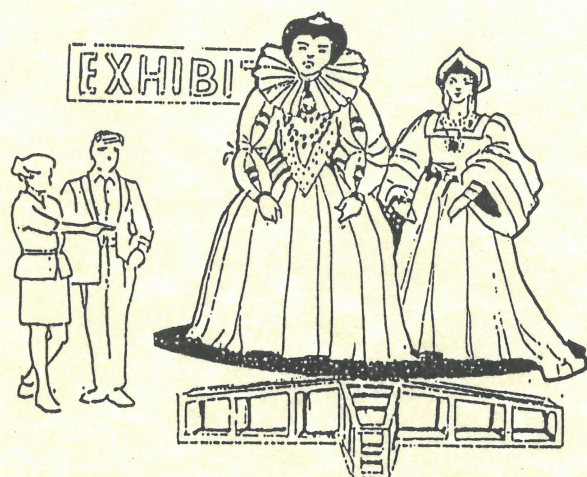

Stand

COBWEB MAKING EQUIPMENT *

WHY WAIT FOR THE IMPOSSIBLE

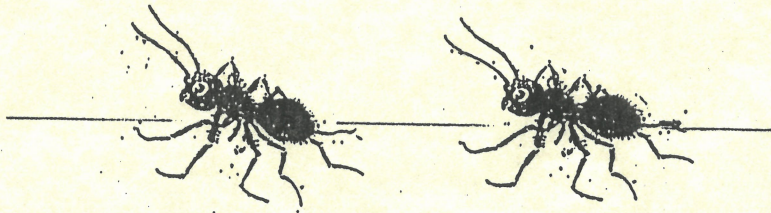

CONCEPT'S "SPINNER" attachment is a precision machined spinning head, which is acknowledged to produce a more perfect simulation of a cobweb than any other technique.

When fitted into an ordinary electric drill and used with CONCEPT'S COBWEB SOLUTION, the "SPINNER" produces an incredibly realistic Cobweb effect, ideal for set and window dressing.

Because the web is slightly elastic it will remain intact for long periods of time, and can easily be peeled off non porous surfaces without the need for solvents.

The appearance of the web can be enhanced with the selected use of fullers earth or talc.

The convenience of having a compact cobweb spinning attachment at hand makes the CONCEPT "SPINNER" an essential investment for all designers and set dressers.
